

FAİK METAL

BENDING & CONS.CO

ABOUT US

FAİK METAL, established in 2010 and headquartered in Bursa, is one of the leading firms specialized in the welding and machining of stainless steel materials in Turkey.

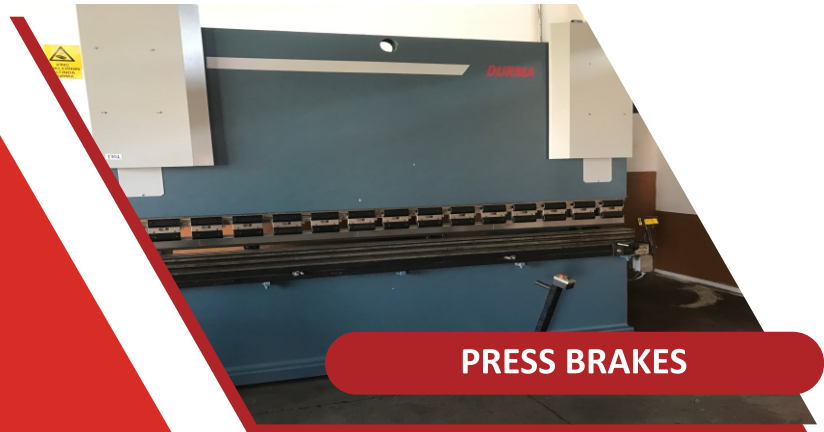

Thanks to its proactive team of experienced and expertised individuals, led by a professional, innovative and dynamic management team, FAİK METAL has built up a good reputation and solid and extensive customer base in almost all branches of industry which use stainless steel.

As part of its long-term strategy of associating its brand with quality, the firm adopted a policy of continuously maintaining the high quality in-house, with strict commitment to the honesty principles. The company has been developing its quality management system in accordance with DS/EN ISO 9001 since 2013.

With its mission to provide cost-effective services without sacrificing customers' needs and quality expectations, and having full compliance with E.U. standards in the business field, FAİK METAL has been aiming to keep pace with the changing conditions of the market by expanding their boundaries with the best way to serve the customers and by trusting the experienced staff of the dynamic young firm.
